## RULES FOR PUBLISHING AND PRESENTING ARTICLES OF THE VIETNAMESE ENT JOURNAL

**ARTICLE TITLE:** Capital letters, concise, maximum 30 words and showing the main content of the article, avoid abbreviations

Author A1, Author B2.... and Author C3\*

- *Author order: arranged from most to least contributed, separated by commas. The first author and the corresponding author are defaulted as the main author.*

*1Agency X, 2Agency Y, 3Agency Z. In case all authors are from the same agency, there is no need to number.*

*(\*) The author is responsible for contacting. If the corresponding author is not the first author, it is placed last, preceded by the word "and". Notes section (\*): contact author, clearly state address, email (this section is placed at the foot of the first page of the article).*

**ABSTRACT:** located at the beginning of the article, the summary is very brief, showing the main results and conclusions of the research. The summary is presented in the form of a paragraph without separating each section and no more than 200 words.

English abstract (Abstract) The English title of the article is written in capital letters, translated from the Vietnamese abstract, including keywords.

**KEYWORDS:** showing the main problem that the study addresses, maximum 6 words or phrases.

### ARTICLE CONTENT

#### 1. PROBLEM STATEMENT

Introduce the reason for conducting the research in relation to other studies that have been done previously at home and abroad. From there, set out clear, appropriate, and feasible goals. This section should be approximately 500 words long and should include at least 5 references.

#### 2. . SUBJECTS AND METHODS

Brief, complete information about the research process. Only new, first-time procedures should be described in detail, with references cited for these research procedures. This section includes 3 main parts as follows:

**2.1. Subjects** (subject group, selection criteria, exclusion criteria).

**2.2. Methods** (including research design, sample size and sampling, research content/indicators, research procedures, data processing methods, time and location of the study).

**2.3. Research ethics** (clearly state the aspects and methods of ensuring ethics in the research. If the research has been approved by the Biomedical Research Ethics Board (IRB), the number and date of the research ethics approval must be clearly stated).

#### 3. RESULTS

The results section is presented in accordance with each topic of the set objectives. Figures and tables are presented from number 1 and consecutively in the order of appearance, including titles, comments, and brief notes below. The total number of figures and tables is at least 3 and should not exceed 7 tables.

#### 4. DISCUSSION

Discuss according to the results and questions/objectives set. Present in paragraphs, argumentative and explanatory. Discuss only the content related to the results obtained. Do not repeat the names of tables and research results.

#### 5. CONCLUSION

Write briefly, state the main findings drawn from the research results, do not list the research results again.

#### REFERENCES

Documents are collected and arranged in the order of citation and must be cited in the article (not by author name and year). Each article should have 10 to 15 references, except for the review article. References must be kept in their original form, not transcribed or translated. Limit the use of theses, dissertations, textbooks and websites as references.

#### ACKNOWLEDGEMENTS (if any)

The author clearly states the research funding agency (if any) and commits to not having any conflict of interest from the research results. This section is presented before the References and does not need to be numbered.
